Opaque Alu

Soltis 92

Optimum performance to improve building comfort

Thanks to its Color, Alu and Opaque versions, the Soltis 92 range allows you to improve the comfort of occupants

92 Color & Alu

- **Keeps out up to 97% of the heat:** acts like a heat shield. Its micro-vents filter the heat, reducing a building's energy costs.
- **Glare control** is combined with excellent transparency for better user comfort. Its thermal and optical performance earns building certification program points (LEED, BREEAM, Minergie, HQE, etc.).

A range of colors designed by our design office to match the entire building environment (joinery, façades, profiles).

- **High color resistance over time:** color is preserved even after several years of exposure (according to the ISO 105 A02 scale).

92 Opaque Alu

A solution adapted according to your needs for a complete opacity:

- maximum opacity level (Class 4 according to EN 14501 standard)
- ideal for the most light-sensitive areas: rooms for conserving artwork, radiology and photography labs, etc.
- no detectable transmission of visible light, infra-red rays or UV rays
- resistance to harsh weather elements when used outdoors.

**Outstanding thermal
and
visual performances**

A range of colours to match every kind of project

The new Soltis 92 range features colors designed by our design office to complement the building's entire environment (joinery, openings and facades). The colours present tones that match the most common colours (RAL and NCS references).
